

We bend your dreams in wood

JB YACHT DOORS:

JB Yacht Doors are normally made in composite construction – well balanced with a honeycomb core material and exactly equal thickness of side material, and can be delivered in any wood specie required.

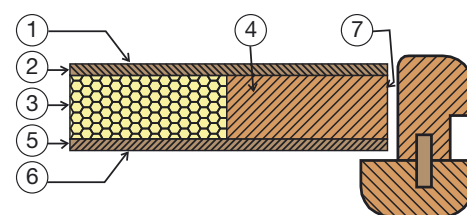

JB Yacht Doors have proved to be absolutely stable against wharping and twisting as well as benefitting of low weight.

Solid inlays can be placed anywhere upon request for hinges and doorlock.

JB Yacht Doors are veneered 1 or 2 sides with your choice of prime sliced veneers, High Pressure Laminate or any other material requested by the customer.

JB Yacht Doors are delivered standard as 19, 25 or 31 mm.

Traditional panelled doors can also also be supplied.

JB DOOR SANDWICH CONSTRUCTION:

1. 0,6 mm selected hardwood veneers / High Pressure Laminate / Painted surface
2. 2,0 mm medium density fibreboard
3. 13 – 25 mm Honeycomb
4. Plywood reinforcement for doorlock / hinges
5. 2,0 mm medium density fibreboard
6. 0,6 mm selected hardwood veneers / High Pressure Laminate / Painted surface
7. Edge-veneers of same species as face

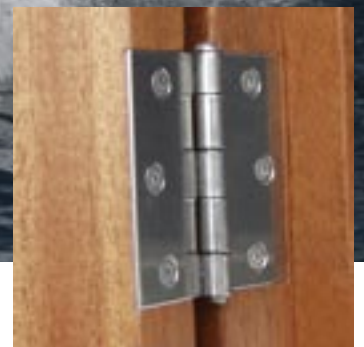

JB DOOR FRAMES:

JB Doorframes are either laminated of prime sliced veneers or prime solid timber in a comprehensive range of standard sizes, shapes and profiles but special shapes and profiles are also custom-made upon request.

JB Doorframes can be delivered in any wood specie required.

The special twin-part door frame makes installation very easy and on request we provide either a dwg.file with the cut-out measure for programming a CNC-controlled router or a paper template with the same measures.

JB Yacht Doors and Doorframes are delivered either un-varnished, pre-varnished for customer's final coating, or fully varnished according to customer's specifications – completely ready for installation.

Routing for hinges and doorlock according to customers specifications.

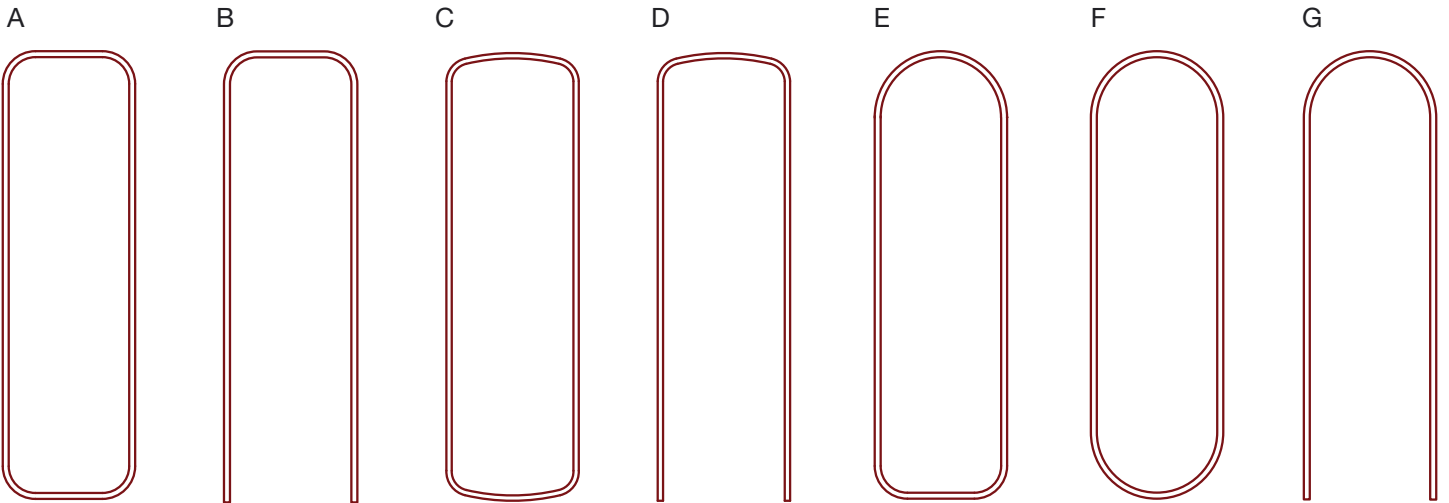

JB Doorframes are either laminated of prime sliced veneers or prime solid timber in a comprehensive range of standard sizes but are also custom-made upon request.

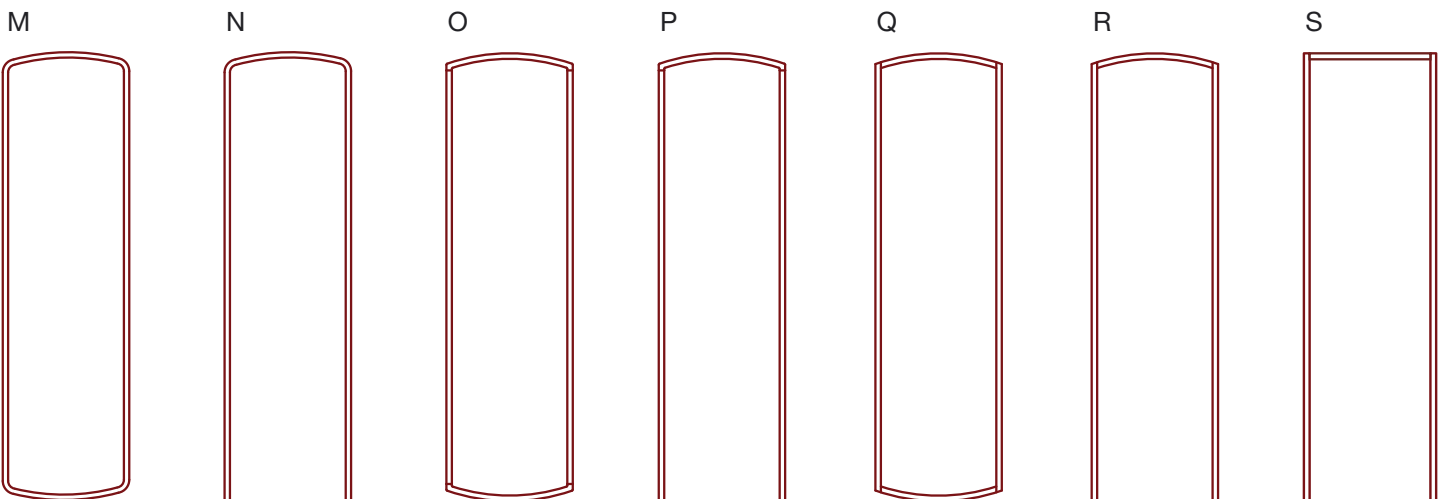

Any of the JB Doorframes can also be produced to fit composite bulkheads up to 120 mm thickness as shown to the right.

JB Doorframes come in a range of shapes that will accommodate all yacht interiors. Please refer to below standard shapes.

JB HATCH AND PORTLIGHT TRIMS:

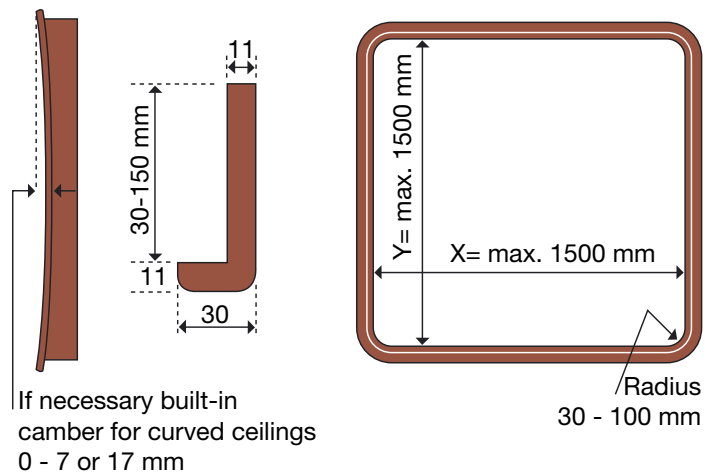

JB Hatch and Portlight Trims are made of prime sliced veneers in any wood specie required.

The trims are available for all major hatch and portlight brands on the market, regardless of size and age.

The trims are available with your choice of either horizontal or vertical veneer.

Upon request the trims can be supplied to accommodate cambered headlinings.

JB Hatch and Portlight Trims are delivered either un-varnished, pre-varnished for customer's final coating, or fully varnished according to customer's specifications – completely ready for installation.

JB MOULDINGS AND FIDDLES:

JB Marine has more than 700 various tools available for nearly any shape of laminated mouldings and fiddles in a modern yacht interior.

JB Marine offers a range of profiles to accommodate table tops, bulkheads, berths and other applications in a yacht.

JB SPECIAL PURPOSE ITEMS:

During the years JB Marine has created a number of special purpose items for interiors in yachts – Curved Ladder Steps, Chart table moulding with handhold, Grabrails, Armchairs, Curved toilet cabins, Instrument panels, Computer monitor cabinets etc.

Please do not hesitate to contact us for your your special requirements.

JB CORNER PROFILES

JB Laminated Corner Profiles are designed to accommodate construction of toilet/bathroom cabins, cupboards, shelves, in- and outside corners of settee, engine-compartments for sailing yachts etc.

JB Laminated Corner Profiles are available in all wood species in many different sizes ranging from rad. 40 mm up to rad. 350 mm in either 90° or 180° angle.

JB MARINE is a Danish company which is specialized in development and production of fine yacht interiors.

JB MARINE carries a comprehensive program of doors, doorframes, hatch trims, mouldings and fiddles, ladder steps etc. to accommodate any modern yacht interior but we are also supplying complete interior kits, custom-made to your requirements.

JB MARINE use only first grade rawmaterial of fine hardwood veneers, which are personally inspected before entering into production. Every item is available in the exact hardwood specie you may require.

JB MARINE produces with newest modern CNC technology while securing traditional craftsmanship.
